Senior Software Engineer with 5+ years across fintech and banking, building production backend, cloud, and AI systems – applied ML since 2021, production LLM agents today. Currently building NatWest's AI agent platform on AWS ECS with Terraform and GitLab CI/CD. Accessibility tooling adopted by **12 feature teams**; ECS auto-scaling that cut AWS spend by roughly **\$10,000 a year**. HashiCorp, Claude, and AWS certified.

Experience

NatWest

Gurugram, India

Senior Software Engineer, DevOps & AI

Nov 2025 – Present

- Built the **AI agent platform** that now runs the team's production agents – **AWS ECS**, orchestrated with **Terraform** and **GitLab CI/CD**.
- Co-designed production **banking workflow agents** – agent coaching and request flows, product requirements intake, and source of funds verification – in **Python** with **OpenAI**, **Google Gemini**, and **LangChain**.
- Cut AWS spend by roughly **\$10,000 a year** by implementing **ECS auto-scaling** across the platform's services.
- Built **Accessibility Checker**, a **Kiro** skill that scans frontend code for accessibility issues and suggests fixes, and packaged it as a **GitLab CI/CD template** that integrates into any pipeline in three lines, publishing issues, fixes, and an HTML report as a build artifact.
- Chosen over **two competing team solutions** and adopted by **12 feature teams** across the Commercial & Institutional (C&I) business area, catching roughly **4,000 accessibility issues** before production.
- Own **MongoDB Atlas** and **Amazon Aurora PostgreSQL** infrastructure end to end, standardized through reusable **Terraform** modules published to a private module registry.
- Led multiple production releases including the **tech go-live** for the AI agents, owning CI/CD promotion, rollout validation, health checks, and post-release monitoring.

Forwood Safety

Queensland, Australia

Technical Lead

Dec 2024 – Nov 2025

- Led a team of **5 engineers** across concurrent projects, owning Agile delivery in Jira, refining backlogs, and clearing blockers.
- Partnered with product managers and stakeholders to set the technical roadmap and prioritize technical debt, keeping engineering aligned to business priorities.
- Raised code quality and delivery speed across the team through code reviews, pair programming, design sessions, and documentation the team still runs on.

Full Stack Developer & Release Manager

Oct 2022 – Dec 2024

- Architected the backend APIs behind the **Safety+** mobile app and owned deployment end to end across every environment.
- Shipped real-time localization in **23 languages** via **Lokalise**, accelerating enterprise onboarding for **OceanaGold**, **Fiberhost**, and **HEDNO**.
- Raised test coverage to **80%** and cut post-release defects by **25%** with unit and integration suites in Jest, Enzyme, and Python unittest.
- Ran the full release lifecycle – environments, versioning, and hotfixes – on **AWS**, **Terraform**, **Jenkins**, and **Ansible**, with minimal downtime.
- Designed and shipped **Multi-Factor Authentication (MFA)** for client login across email and SMS channels.

Launchpad Fintech Pvt. Ltd.

Gurugram, India

Full Stack Developer

Jan 2021 – Oct 2022

- Launched **bondsindia.com**, a financial bonds platform architected for **100,000+ concurrent users**, built with a three-person engineering team.
- Led backend development for the core trading modules – **KYC**, **IPO**, and secondary trading – including real-time transaction reporting APIs to **BSE** and **NSE** and automated onboarding workflows for both exchanges.
- Built a lightweight **ML recommendation engine** that suggested bonds from a user's investment behavior, improving engagement on the platform.

- Designed the admin portal's **role-based access control (RBAC)** system, governing granular, module-level permissions across user roles.
- Moved AWS provisioning off manual setup onto **infrastructure as code (IaC)** with **AWS SAM**, making deployments faster and repeatable.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL, C, C++

AI & LLM: OpenAI API, Google Gemini, LangChain, AI agent orchestration, prompt engineering

Cloud & DevOps: AWS (ECS, EC2, S3, RDS, Lambda, API Gateway, DynamoDB, CloudFront, IAM, CloudWatch, Secrets Manager, Cognito, VPC, Step Functions, CodePipeline, SES, SAM), Terraform, Docker, Jenkins, GitLab CI/CD, Ansible

Backend: Django, Django REST Framework, FastAPI, REST API design

Frontend: React.js, Next.js, React Native, HTML, CSS, Bootstrap, jQuery

Databases: PostgreSQL, Amazon Aurora PostgreSQL, MongoDB, MongoDB Atlas, MySQL, Redis

Practices: CI/CD, Infrastructure as Code (IaC), web accessibility (a11y) tooling, release management, test automation, Agile/Scrum, code review, mentoring

Projects

Cloud Cost Guardrail Analyzer

Personal Project

Tech Stack: AWS Lambda, API Gateway, EventBridge, Cost Explorer, Terraform, FastAPI, Next.js

[Live demo](#)

- Serverless cost-guardrail service on **AWS Lambda** and **API Gateway**, scheduled with **EventBridge** and provisioned entirely with **Terraform**.
- Detects idle **EC2**, **EBS**, and **RDS** resources and reports month-to-date spend and top services via **Cost Explorer** and **CloudWatch**.
- Sends owner-aware alerts over Gmail and WhatsApp with concrete remediation steps, so each finding reaches the person who can actually act on it.
- **FastAPI** backend and **Next.js** dashboard, with CI validation on every change.

ShopHub — E-Commerce Platform

Personal Project

Tech Stack: Next.js 15, TypeScript, Tailwind, Django 5, DRF, JWT, PostgreSQL github.com/Rohit1204/my-ecommerce-app

- Split-deploy storefront and API: a **Next.js 15** App Router frontend against a **Django 5** and **DRF** backend, so each ships independently.
- **JWT** authentication rather than sessions, because the UI and API run on different origins.
- **Idempotent checkout** that stays correct under network retries and double submits.
- **OpenAPI** schema via drf-spectacular, backend and frontend test suites, and a PostgreSQL-ready deployment path.

Certifications

- * HashiCorp Certified: Terraform Associate (HCTA0-004) — HashiCorp
- * Claude Certified Associate — Anthropic
- * AWS Certified Cloud Practitioner — Amazon Web Services

Achievements

- * **2nd place, All-India** — NatWest SaaSinator Hackathon, for a customer onboarding solution.
- * Accessibility solution **selected over two competing team proposals** and adopted across the NatWest C&I business area.
- * **Patent holder** — design of an electrical portable toothbrush.
- * **A+ performance rating** at Forwood Safety for delivery and technical ownership.
- * Co-lead, **Google Developer Student Club (GDSC)** — ran hands-on workshops for student developers.

Education

Ch. Ranbir Singh State Institute of Engineering and Technology (M.D University)

Aug 2017 – May 2021

Bachelor of Technology in Computer Science

Jhajjar, Haryana

- * Graduated with (70%) aggregate, awarded Distinction and Honours.
